

Keep older kids safe in cars

Sometimes children feel embarrassed or too grown up to use a child restraint. Below are some tips to help parents convince bigger kids to continue to use booster seats.

- Explain why car seats and safety belts are important for safety.
- Continue to praise your child for being buckled up safely.
- Praise them for role modelling good safety to younger siblings.
- Treat being able to buckle themselves in as an important milestone.
- Make it fun—Turn a booster seat into a pirate ship, rocket or fairy's chariot.
