

# Safekids New Zealand Information & Planning Workshops '09

Safekids New Zealand concluded the 2009/10 Campaign Information & Planning Days. 23 workshops were held across the country and attracted close to 400 participants, including injury prevention and health workers, Well Child providers, Police, Fire Service, AA, teachers, doctors, community leaders, councils, road safety co-ordinators, ACC, churches, Maori, Pacific and Asian providers, caregivers and parents.

The workshops are a great opportunity for communities to network, gain new knowledge, and to plan successful child injury prevention activities within communities.
