

Speed Trailer in use in Avondale

A speed trailer for monitoring speed on the road is part of the ACC Road Safety Programme. Wattyl had the trailer installed outside their premises in Avondale for three weeks.

This is what they had to say about the programme:

“The speed trailer made a significant difference on our site. We have a situation where traffic leaving our site crosses the path of people walking to our car park so drivers need to be very aware of their speed as they approach this area. The speed camera was picking up approaching cars from a distance that gave the driver time to slow down and they did! The effect of the speed camera was such that we have put in a forward request to have it back in three months.”
